

Approval & Reception Procedure

DMC – Departamento de Materiais de Construção	
Gully Tops and Manhole Tops for Vehicular and Pedestrian Areas	Document No. ARP/DMC/05
	Date : 2010-07-01
	Page No. 1 of 1

1. Reference Standard

The Reference standard is EN 124: 1994.

2. Approval Procedure

The manufacturer's catalogue and technical specifications shall be submitted.

For approval of the proposed materials, the project specification should be considered.

3. Reception Procedure

Submission of documents

Manufacturer's certificate of origin, quality and quantity should be submitted. The certificate shall include: name of manufacturer, place of manufacturer, certificate no, date of issue of certificate, manufacturer mark on products, list of certified products, type of material used, class and dimensions.

4. Inspection of lot

Lot is any quantity of pieces of the same type of material used, class and dimensions, delivered at one time for inspection. The maximum number of pieces in one lot is 150.

2 sets of tops (cover and frame) of each lot shall be collected for test. Load test and dimensional verifications shall be performed in accordance with the standard.

5. Acceptance Criteria

Every lot shall comply with the standard.

If one specimen fails to comply with the requirements in the standard, two additional specimens shall be collected. The additional specimens shall comply with the standard; otherwise, the lot shall be rejected.
